Software Engineer

Software engineer with over 20 years of experience focused on language design; systems engineering; performance and performance tooling; and backend development.

Professional Experience

Senior Software Engineer
February 2018 - Current
Meta/Facebook

- Currently working as a maintainer of bpftrace: new language features, refactoring, community building and engagement, and writing tech posts
- Worked on a variety of eBPF tools such as bpfilter, bpfvv, and BCC.
- Conducted performance investigations and worked on profiling tools that run on every host at Meta, utilizing such technologies as eBPF, Jemalloc, Intel LBRs, and linux perf.
- Worked on BOLT and CSSPGO pipelines to improve binary performance

Senior Software Engineer
October 2013 – February 2018
Spotify

- Two years as a full-stack engineer on the Ads team: desktop ads & ad delivery infrastructure
- Two years on the Radio team: desktop and Android radio product features
- Additionally, desktop app infrastructure: linting, building, translations, and testing

Lead Front End Engineer
February 2013 – October 2013
Zeebox

- Developed Javascript games, responsive websites, and other web applications
- Managed a group of mid-level developers
- Advised on web best practices; code management and versioning; cross-browser/cross-device compatibility; and browser memory management

Senior Web Developer
February 2007 – February 2013
The City University of New York (CUNY)

- Team Leader of Central Office web team (developers, content editors, server admins)

- Developed for and maintained cuny.edu: XSL, XML, Javascript, PHP, MySQL, HTML 5, CSS3
- Managed university web projects: CUNY School of Law, CUNY School of Public Health, Guttman Community College
- Advised on content management strategies, PR campaigns, social media initiatives, latest web trends

Web Developer
October 2005 – May 2007
Sarah Lawrence College

Web Developer
June 1997 – September 1999
UCLA Medical School

Languages/Technologies

C/C++, eBPF, LLVM IR and compiler pipelines, Python, Javascript, MySQL, Rust

Publications and Talks

- Strobelight: A profiling service built on open source technology
- bpftrace
    - Evolving a DSL: How bpftrace makes language design decisions
    - Keeping bpftrace DRY with Hygienic Macros
    - My Type of Language
    - Compile Time
    - C-Interop
    - Imports
    - The Path to 1.0
- LPC: BPF Verifier Visualizer

Education

B.A. in Literature 2003
University of California Santa Barbara
College of Creative Studies

M.F.A. in Creative Writing: Poetry May 2007
Sarah Lawrence College
